# Company Overview

Glanda International is a family owned & run company that has been operating since 1988. Glanda is wholly Australian and specialises in manufacturing high quality industrial & outdoor wet weather & protective apparel.

Since 1988 Glanda has experienced significant growth and has attained a leading position within the industry. This has been achieved by using advanced technical construction and manufacturing processes, such as automated cutting for precision & speed, along with seam sealing technology that ensures completely water proof seams. After moving into a new & larger facility in 2012, Glanda has ensured that this growth will continue into the future.

Glanda's design development department as well as the use of high quality fabrics such as TORANT® have enabled Glanda to maintain a well-respected position in the industry.

# Our Services

We pride ourselves in being able to offer cutting edge design, we consult & liaise with you to gain a clear understanding of your requirement. We utilise state of the art Lectra CAD software allowing us to tailor garments to meet your specific requirement.
